

ENJOY TRULY ETHICAL COFFEE

Let's Talk Coffee

Specifically, Eco Roast Coffee

There is a fine balance to strike between the need for increased coffee supply and the impact this has on the environment, we believe that one should not come at the cost of the other!

Eco Roast delivers coffee that helps to maintain this delicate balance.

With our Zero Waste, Circular Economy Technology we can deliver you a fresh, delicious and ethical coffee that will also reduce your waste, cut your Carbon Footprint, improve your Corporate Social Responsibility and save you money!

Coffee Today

With coffee becoming an ever increasingly popular part of everyday business, it is equally important to choose the right coffee supplier to fit your business needs and ethics.

From the physical needs of your business to the Corporate Social Responsibility it has pledged to meet.

Eco Roast Coffee is sure to deliver all your requirements whilst improving your CSR.

The Closed Loop System

We are the only commercial coffee roastery in the world that runs this unique closed loop system.

Used Coffee Grounds are collected from our customers, recycled it into energy rich bio-fuel which we use to produce the energy to roast fresh coffee. We then pack and return to the customer with fresh eco roasted coffee!

The cycle can then begin over again.

Quality Coffee

Our coffees are skillfully crafted by our master roasters operating our Eco Roasters. Whether they are roasting 5kg or 500kg, quality is at the top of their priorities.

We pride ourselves in the quality of our finished products. We know you will also love what we produce as much as how we produce it.

Used Coffee Grounds

With over 500,000 Tons of Used Coffee Grounds produced in the UK each year, it is essential that we divert as much from landfill as possible. This will reduce the levels of Methane & CO2 emissions created.

Turning it into biofuel is a great way to recycle this abundant resource.

UCG Collection

We have different ways for you to separate and store your UCG ready for collection and recycling

We have a growing UK network of partners who specialize in Used Coffee Grounds collection

We will work with you to secure the best method of collecting and storing your used coffee grounds.

Harnessing the power of Coffee

Once the Used Coffee Grounds have been reprocessed into Bio-Fuels, we can use this to produce the thermal energy we require to roast Deliciously Responsible Eco Roast Coffee.

Using an average of 5kg of fuel per 70kg batch makes this an incredibly efficient method of roasting.

Ethical Sourcing

As well as making sure the coffee we buy is of superior quality, it is equally important to us that we are sourcing our coffees ethically.

We have developed a number of direct trade relationships with the growers so that we can be assured of its quality and provenance. This also allows us to give back direct to the farmers, ensuring a fair relationship between us.

Ethical Packaging

We have super environmentally conscience packaging options.

Our latest foodservice packaging can be recycled in widely available paper recycling systems.

Our latest retail offering is a compostable ziplock pouch, which will also break down once discarded

ZERO WASTE

To enable our customers to become truly ZERO Waste, we have developed a delivery and collection service through our brand partners in a number of areas in the UK that will allow foodservice customers to receive their coffee in reusable “eco tubs” as well as grounds collection tubs too. Each time you have a fresh delivery, the used coffee is collected at the same time. Reducing our impact on the planet as well as your waste costs.

Coffee Blends

We produce a comprehensive range of deliciously responsible coffee blends to choose from.

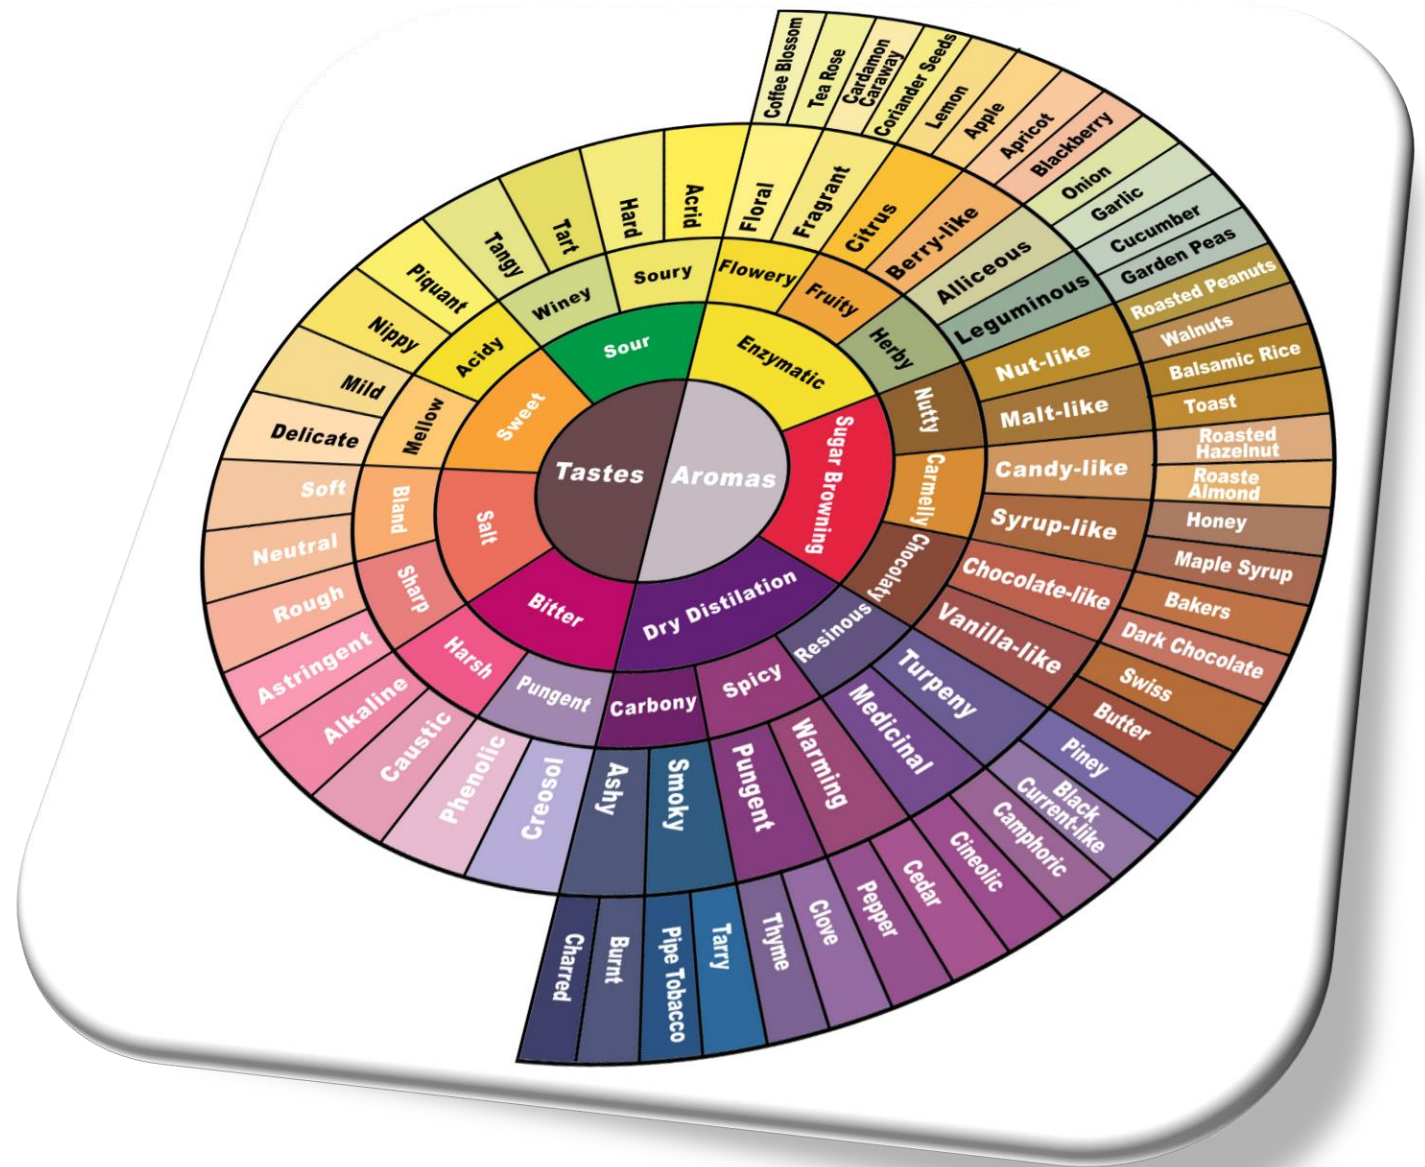

Each of our core blends has its own unique attribute to it as well as being Eco Roasted & Carbon Neutral.

High Caffeine – Direct Trade –
Fairtrade – Rainforest Alliance –
Triple Certified – Ethical Decaf –
Social Impact

Taste Matching

We understand the importance of consistency with your coffee, which is why we offer a blend matching service to ensure you can easily switch to Eco Roast without jeopardizing your current customer loyalty.

Social Impact Projects

We work directly with a collection of social impact projects at origin.

This allows us to bring these projects to the attention of our clients, who may wish to engage with this project through Eco Roast to help create greater awareness and impact.

Training & Support

Ensuring our clients are set up using Eco Roast properly is key. We invest in our customers by offering continued training and support for their coffee offering.

Roastery visits to understand our ethics to on site barista training are just some of the services we can offer.

Equipment Partners

Being specialists in all things coffee, it is important that we offer a professional coffee equipment solution for your business too.

To achieve this, we have a close working partnerships with reputable coffee equipment & service companies.

They will look after the supply, installation, maintenance and breakdown cover of your equipment.

Carbon Neutral

In addition to our Zero Waste roasting technology, we also set up the Carbon Neutral Coffee initiative and work with the organization **Sustainably Run** to plant fruit trees in 3rd world regions.

This offers numerous benefits in addition to offsetting the Carbon emissions produced in getting this great coffee to the consumer.

We provide certificates to our clients in their name to show the carbon balance of their coffee.

Zero Waste Production

Our current Zero Waste Eco Roaster can produce 2000kg of fresh roasted coffee per day.

This is scalable and could easily be increased up to double this production output if required.

We are confident that we have the scalability to meet even the highest volume demands.

B Corp Movement

We are super proud to be part of the B Corp movement, having been certified as the Highest Scoring B Corp Coffee Roastery in the World. Verification, if needed, that our processes and technology are industry leading.

Become part of the movement by selecting Eco Roast Coffee for your supply today.
